

A person wearing a red jacket and a helmet is riding a fat bike across a vast, flat, snow-covered landscape. The background features steep, snow-dusted mountains with patches of evergreen trees. The sky is a pale, overcast blue. The overall scene is serene and captures a winter recreational activity in a majestic natural setting.

Winter magic in La Malbaie

The region's powerful, magnetic attraction began 400 million years ago with an epic meteorite impact that sculpted one of the most beautiful and unique landscapes in Quebec. It also left behind a particular magnetism and energy where visitors stop, breathe and reawaken their senses. A reconnection worth experiencing.

The town of La Malbaie is an exceptional place to enjoy winter because it is full of snow and some very warm residents.
